

GRAND TOUR OF THE VANOISE GLACIERS 9 DAYS Self-guided

In the heart of France's first national park

First of its kind in France, the Vanoise National Park was established in 1963. A vast territory where flora, fauna and rocky mineral world are all preserved. Between the Maurienne and Tarentaise valleys, its borders meet the Gran Paradiso massif and National Park in Italy, forming the largest nature reserve in Europe.

The tour will bring you around the famous "Dômes de la Vanoise", a range of glaciers extending over twenty kilometres at the centre of the Park and passes at the foot of the Grande Casse, the highest summit in Savoie at 3855m. In 1860, a rich Englishman employed a courageous woodsman to cut more than 800 steps in the ice so the summit could be reached for the first time.

Crossing some of the major landscapes in the Alps, this tour offers you the chance to enjoy the massif a little longer by tackling the Col du Souffre and the Gébroulaz glacier to the west (depending on conditions). Just over a week's trek, with no transfers and some nights in small mountain refuges, total immersion guaranteed!
